CAREER OBJECTIVE

"Passionate software developer with a strong foundation in software engineering, seeking to build efficient and user-centric applications. Eager to leverage programming and front-end development skills to create scalable solutions, including ML-integrated systems, while growing in a dynamic team environment."

EDUCATION

COER University

Bachelor of Technology – Computer Science & Engineering

Aug 2024– Present

CGPA: 9.5/10

Spring Field School

High School Education (CSBE) –10th & 12th

April 2022– April 2024

PROJECTS

IntelliResume

Jan 2026

Full-stack AI-powered resume Analyzer

Built a platform using GPT-4; delivers score breakdown, keyword gap analysis, AI section rewriter & personalized interview Q&A prep in <30 seconds.

Tech: React.js, TypeScript, Supabase, OpenAI GPT-4, Tailwind CSS, Vite

AI-Powered Finance Dashboard

Oct 2025

ML-Based Financial Analytics Platform

AI Dashboard with ML insights: 25% improvement in accuracy, 10 hours/week saved manually.

Tech: Python, Power BI, ML, Plotly

Housing Price Prediction using Machine Learning

June 2025

ML Regression Model

Statistical feature selection (p-value<0.05, VIF<3) + polynomial features → $R^2=0.514$ (p<0.001)

Tech: Python, scikit-learn, Matplotlib

RESEARCH

Customer Churn Prediction in Telecom:

Developed a churn prediction system using machine learning algorithm (Random Forest) on a consolidated dataset of 40,000+ records with 45+ engineered features.

- Achieved 79% prediction accuracy and 0.85 F1-score representing 15–20% improvement over baseline models
- Built Flask REST API to serve the trained model for real-time predictions
- Identified tenure, monthly charges, contract type, and payment method as top predictors of customer churn

TECHNICAL SKILLS

Programming Languages : C++, Python, SQL

Frontend : React.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS

Backend : Node.js, Express, PHP, Flask

Database : MySQL, MongoDB, Supabase, PostgreSQL

Tools & Technologies : Git, GitHub, VS Code, Jupyter Notebook, Postman, AWS

SOFT SKILLS

- Team Collaboration, Analytical Thinking, Critical Problem-Solving
- Effective Communication, Active Listening, Time Management
- Creativity, Stress Management, Public Speaking

AWARDS & ACHIEVEMENTS

- 2nd Prize : Hackathon 5.0 2025 (Intra-college event)
- LeetCode 75 Badge : Achieved by solving 75+ coding problems across data structures algorithms
- Certificate of Excellence : Ideathon & Hackathons
- Represented COER University at HackIndia 2025 : India's biggest Web3 & AI Hackathon, competing among 500+ teams
- 5-Star Gold Badge in C++ (HackerRank) : Recognized for expertise in object-oriented programming, memory management, and algorithms.
- 2nd Position : BrainByte Weekly Coding Session (University-level, 200+ participants)

EXTRACURRICULAM ACTIVITIES

- Member : Competitive Coding Club (Weekly sessions and hackathons)
- Participant : 30-Day LeetCode Challenge (Solved 100+ problems consistently)
- BrainByte Weekly Coding Sessions : Regular participant
- TRAIC Committee Member : Involved in organizing technical events, workshops, and project-building activities for university students
